

Cerfa-Kleen® 5379

Non-silicated soak tank cleaning compound

DESCRIPTION

Cerfa-Kleen 5379 is an alkaline liquid soak tank cleaning compound designed to remove lapping compounds, polishes, grinding fluids, and general shop soils. It will not attack aluminum or aluminum alloys.

Cerfa-Kleen 5379 is free rinsing and will not leave a residue which could effect finishing operations, such as plating. This feature is particularly critical in the computer disc industry. There are no chelants in **Cerfa-Kleen 5379** (such as EDTA, NTA, HEDTA or glucoheptonate) commonly used in cleaning formulas. This product does not contain citric acid.

FEATURES / BENEFITS

- Outstanding cleaning capability for optimal soil removal.
- Works on a wide variety of alloys which reduces costs via consolidation of products and purchases.

DATA (TYPICAL VALUES)

Appearance	Clear, pale straw liquid
Solubility	Miscible with water in all proportions
pH (2% Solution)	9.4
Specific Gravity	1.10
Silicates	none

HEALTH AND SAFETY

Refer to SDS for proper handling and disposal. Please note that the SDS includes handling, health and disposal information which should be passed on to your employees, and to anyone else who comes in contact with our product. Additional advice can also be obtained from your local Houghton representative.

NOTE: Read and understand all precautions on container labels before using this product.
