

Rust Veto® 2212

Synthetic aqueous base rust preventive

DESCRIPTION

Rust Veto 2212 is an all synthetic aqueous base rust preventive, which has the features of a non-nitrited chemical rust inhibitor. It is recommended for use at 5% concentration. It forms a clear solution and is recommended for use on ferrous and nonferrous metals.

Rust Veto 2212 has many new properties which classifies it as a new and modern rust inhibitor.

FEATURES / BENEFITS

- No oil - eliminates disposal problems common with water base preservation
- No nitrites - eliminates health hazard associated with this chemical
- Non-staining to brass or copper
- Hard water stable - solutions are stable in hard water, up to 500 ppm, while retaining rust protection

DATA (TYPICAL VALUES)

Appearance	Clear, to slight hazy flourescent green liquid
Total Alkali	9.4 ± 0.5% as KOH
pH, 5% Solution	9.1 ± 0.2
Effect on Metals	Safe on all metals
Free Caustic	None
Phosphates	None
Solubility	Freely soluble
Operating Temperatures	Ambient to 135°F
Use Concentration	5% by volume

HEALTH AND SAFETY

Refer to SDS for proper handling and disposal. Please note that the SDS includes handling, health and disposal information which should be passed on to your employees, and to anyone else who comes in contact with our product. Additional advice can also be obtained from your local Houghton representative.

NOTE: Read and understand all precautions on container labels before using this product.
