

Rust Veto® 4216

Rust preventive

DESCRIPTION

Rust Veto 4216 is a clear, low odor, environmentally friendly petroleum derivative. It has superior cleaning properties without the hazardous drawbacks associated with the chlorinated solvents or fluorocarbons, which allows it to be used in numerous assembly and inspection applications.

Rust Veto 4216 has a very bland petroleum odor which gains rapid operator acceptance and approval. It is compatible with a majority of the additive packages used in formulating long-term rust preventives and can be used as a diluent in preparing final coat products for extended protection.

Fine filtration of **Rust Veto 4216** is no problem, as a matter of fact, fine filtration is recommended in recirculating cleaning systems so foreign matter and contaminants are not deposited on precision components.

FEATURES / BENEFITS

- Outstanding cleaning capability for optimal soil removal.
- Imparts corrosion inhibition to parts to protect them from rusting between operations thereby reducing scrap rates.
- Low-odor nature of the product optimizes worker acceptance.

DATA (TYPICAL VALUES)

Appearance	Water white liquid
Specific Gravity @ 60°F	.794
Viscosity @ 100°F SUS	35
Flash Point, °F, COC	150
Pounds per Gallon	6.58

HEALTH AND SAFETY

Refer to SDS for proper handling and disposal. Please note that the SDS includes handling, health and disposal information which should be passed on to your employees, and to anyone else who comes in contact with our product. Additional advice can also be obtained from your local Houghton representative.

NOTE: Read and understand all precautions on container labels before using this product.
